Academic Details

- **Bachelor of Technology (B.Tech)**
Computer Engineering
PARUL UNIVERSITY, VADODARA;
CGPA: 7.01
(2026)

Soft Skills

Analytical | Collaborator | Leader | Adaptable

Technical Skills

- **Programming Languages:**
JavaScript, Python
- **Frameworks:**
React, Express, MongoDB, Node.js, PowerBI

Core Competencies

Agile Methodologies

Software Development Life Cycle

RESTful API

Debugging

Containerization

Web Services

Microservice Design

Performance Optimization

System Scalability

Profile Summary

- I am currently pursuing my engineering degree with a strong focus on full-stack development, particularly the MERN stack (MongoDB, Express.js, React, Node.js).
- I have a solid understanding of core programming concepts and DevOps practices, including version control, CI/CD, and cloud deployment.
- With a deep interest in data analytics, I am passionate about analyzing data trends and patterns to derive actionable insights for informed decision-making.
- I have hands-on experience with data visualization tools like Power BI, along with proficiency in SQL for extracting and managing data from databases.
- Strong analytical and problem-solving skills enable me to break down complex issues and apply data-driven solutions effectively.
- Committed to continuous learning, I am eager to expand my technical skills and pursue a career as a data analyst, leveraging my development background and passion for data.

Work Experience

Hackathon - Backend Developer [PU HACKATHON]

- Developed backend functionality using **Node.js** and **Express.js**, creating RESTful APIs and integrating **MongoDB** for data management.
- Implemented user authentication with **JWT** for secure login and authorization.
- Optimized database queries for improved performance and collaborated with the frontend team to ensure seamless integration.
- Troubleshooted and debugged issues to ensure timely project delivery.

My Projects

Netflix Clone (Frontend Development)

- Developed a responsive Netflix clone using React, HTML, and CSS to replicate the Netflix UI.
- Implemented smooth navigation and routing with React Router for seamless page transitions.
- Integrated TMDB API to fetch real-time data on movies and TV shows.
- Styled the application with CSS to create a modern, user-friendly, and mobile-responsive design.

AI-Driven Supply Chain Optimization Platform

Work as Backend Developer & DevOps Engineer

- Developed backend APIs using **Node.js** for integrating ML models in demand forecasting and route optimization.
- Implemented **Terraform** for infrastructure provisioning and set up **CI/CD pipelines** with **Jenkins**.
- Deployed on **AWS** using **Kubernetes** for container orchestration and **NGINX** for load balancing.
- Monitored system health and performance with **Prometheus** and **Grafana**.

Personal Details

Date of Birth: 24th April 2005

Languages Known: English, Hindi and Gujarati

Address: Vadodara, Gujarat
